

wireless fabric keyboard for smartphones

Customising the wireless fabric keyboard for smartphones is easy. The product has been designed to support any level of customisation that suits your branding requirements.

The standard keyboard supports the following customisation options:

Change the fabric colour to any colour you choose to support your brand identity

Change the style or the colour of the graphics on the fabric keyboard to meet your corporate style guidelines

Add a graphic logo to the keyboard face to increase your branding options

Maximise your branding impact using a photo quality ink-jet printed design

Plastics branding options

Modify the colour of the plastics or change the finish

Print your logo on the plastic battery cover to enhance your branding

Keyboard accessories and software drivers branding options

The stuff sack and the universal device stand can both be screen printed with a logo

The keyboard software drivers can also be enhanced to carry your brand

Some options require an increase in the minimum order quantity and may result in an increase in lead times for the product

OEM/ODM keyboard licensees

The standard keyboard for private label licensees includes the following minimum branding requirements:

Screen printing of a logo onto the battery cover

Branding the keyboard's installation documentation

Keyboard software drivers for each operating system
