

wireless fabric keyboard for smartphones

The ElekTex® wireless fabric keyboard for smartphones enhances mobile working. Its full laptop-size keyboard makes it the perfect tool for mobile workers who need to increase their accessibility and improve their response times when they are on the road. The addition of a full-size keyboard to a mobile device makes time spent using email and mobile applications far more productive. The ElekTex® wireless fabric keyboard works with all mobile email and other mobile applications.

Wherever you are when you need to communicate the wireless fabric keyboard helps you to stay connected and on top of your work. Its lightweight design and easy portability mean that you can roll it up, put it in your pocket or your briefcase and take it everywhere you go.
